My name is Alexander and I would like to share my satisfaction about the quality of product "Back2Life" which I have purchased before a few days ago. The Back2Life was a nice surprise for me, because it's a powerful and useful software. It's really efficient and necessary. It is great and suitable for everyone in order to recover deleted files. Back2Life is a nice program to recover deleted files. Thank you very much, Stephanie! Back2Life is a useful software, because it's a powerful and fast recovery tool, with a lot of options and the ability to scan different structures of your hard drive. Its price is reasonable, and it's available for free. This is the best backup software I have ever tried. I was stuck with my Back2Life 4.1.14 trial version for a little longer, but then I decided that Back2Life just needs the ultimate version now. So I bought the Ultimate version, which is the most expensive one but it was worth of it. Now I got a fully working and stable software. I have to recommend the Back2Life software in general! This product works excellent but there is a minor bug that I have found. The problem is that when I have the Advanced search feature turned on, the Back2Life window will leave a gap every time I have found a file. It also doesn't pause and allow you to search for anything. If it's possible to fix this glitch, I would greatly appreciate it.
