
This article lists some of the best websites and apps you can use to learn a new skill, expand your knowledge, or boost your career. Listed on this post are 37 websites and apps that will teach you practically anything, from making hummus to building apps in node.js. The list includes such websites as Khan Academy and Coursera, which cover science topics; Open Culture; Wikipedia; Youtube; and NPR News. The list also includes such app-based platforms like Duolingo and Code School that focus more on language learning than content-specific instruction (some of these platforms focus on specific languages like Spanish or French). The list includes video platforms like Youtube, Khan Academy, Code School, and Udemy. From these platforms you can learn how to code, how to build mobile apps, or just improve your skills for work. The list also includes article sites like Medium or Wikipedia that are great for reading up on a new skill. These 37 websites and apps are useful for students of all ages seeking to expand their knowledge in any given subject they find personally interesting or useful for their career in the future. The apps in this article are particularly useful because they let you learn whenever you have time—that way it doesn't feel like your attention is being stolen away from other tasks. As the consumer base of the internet grows, the demand for content is exponentially increasing. So it is necessary to be able to find quality content on any topic you find yourself interested in. The list of websites included in this article should help you find quality ways to learn about anything you are interested in understanding or researching. This list includes various online sources for learning English as a Second Language (ESL), like Rosetta Stone, Duolingo, and Tandem. These websites can be used for learning languages other than English as well; Rosetta Stone's website also includes an article about how you can use their product effectively within an American education system. Duolingo allows you to customize your learning experience based on which languages you want to learn, the speed of your learning process, and how much grammar you want to learn. You can start out by learning the basics of the language and then advance into advanced conversation. Rosetta Stone also offers several different levels of English for different age groups. This list includes various apps that help with improving one's writing skills, like Hemingway Editor, Correct My Writing, Grammarly, LanguageTool, and Ginger Page Marker. These apps are useful because they can help reduce typos in writing as well as improve one's writing style through editing. They also provide feedback on one's work so they can continue improving their abilities. The article includes the website "Free Code Camp", which offers free online community to learn how to code. It also has a section of its site dedicated to learning resources, including books, podcasts, and courses. The article also lists the "edX" MOOC platform, which is run by MIT and Harvard University. The platform provides courses in many different areas of study. Coursera is an online education company that partners with 136 universities around the world. The company has worked with 1,152 professors to create 479 courses for students to take for free on the website. They offer specializations in various fields of study including computer science, business management, data science, digital marketing research and much more.
